Abstract
The research project focuses on corporate social responsibility (CSR), which means businesses doing good things for society beyond just making profits. Specifically, it looks at how companies can include sustainable practices, which are actions that help the environment and society, into their everyday operations. It investigates the benefits and challenges associated with integrating sustainable practices, including improved brand reputation and stakeholder engagement. The study examines the role of leadership, organizational culture, and stakeholder engagement in fostering a corporate environment conducive to sustainable practices. It emphasizes the importance of strategic alignment between CSR goals and business objectives, as well as the integration of sustainability principles across all levels of the organizational hierarchy. Overall, this research contributes to the understanding of how businesses can fulfill their social and environmental responsibilities while also achieving their financial objectives, by integrating sustainability into their operations.

Keywords: Block Chain Technology, Flexibility, Security, Data Security, Supply Chain.

1. Introduction
Corporate Social Responsibility (CSR) is the long-term, sustainable improvements for society that can be gained from organization’s promoting positive social, economic and environmental impact. CSR starts with recognizing that an organizations’ activities have an impact on society, the environment and the economy, as well as on their own workforce [1]. It is about the values and ethics that drive an organization’s activities and how it operates. Many organizations will have a CSR policy, which defines their areas of interest and concern and the initiatives they are adopting to improve relations with the people and environments affected by their business operations [2]. The concept of “Corporate Social Responsibility - Integrating Sustainable Practices into Business Operations” emphasizes the importance of businesses taking proactive steps to address environmental, social, and ethical issues while simultaneously creating value for shareholders and stakeholders alike. By integrating sustainability into their operations, companies can not only mitigate risks and enhance their reputation but also contribute to building a more sustainable and equitable world [3].

2. Purpose
The study of “Corporate Social Responsibilities-integrating sustainable practices into business operations” is crucial for several reasons. Researching CSR and its integration into business operations is essential for businesses to align with stakeholder expectations, manage risks, enhance reputation, and ensure long-term sustainability in a rapidly changing business landscape. CSR enhances a company's reputation, leading to increased trust and loyalty from customers, investors, and other stakeholders. Sustainable practices can help mitigate risks associated with environmental damage, regulatory non-compliance, and negative public perception. Adopting CSR practices can differentiate a company from its competitors and attract socially conscious consumers. Embracing sustainability encourages
innovation in products, processes, and business models, driving long-term growth and competitiveness.

3. Objectives
- To Study the benefits and challenges of integrating sustainable practices into business operations.
- To Assess the impact of CSR initiatives on organizational performance.
- To examine the relation between CSR and organizational culture, values, and ethics.

4. Methodology
The study is a descriptive in research design employs a mixed-method approach, incorporating quantitative and qualitative methodologies with data sourced directly from company employees. Regression and correlation are used as statistical tools in this study. The sample size is 130. Simple random technique is used in collection of primary information.

5. Hypothesis
H01- There is no significant impact of CSR initiatives and organizational behaviour in Table 1.
H02- There is no significant relationship between Corporate Social Responsibility and organizational culture, values and ethics in Table 3.

a. Predictors: (Constant), Need strong CSR, sustainable practices, participate, important, conflicts arise, integrated employee performance evaluation, employee suggestions considerations, healthier work environment, communicates, environmental impact

**H01: There Is No Significant Impact of CSR Initiatives on Organizational Performance**

**Regression Analysis:** This table provides the R and R2 values. The R value represents the simple correlation and is 0.873 (the "R" Column), which indicates a low degree of correlation. The R2 value (the "R Square" column) in Table 2.

indicates how much of the total variation in the dependent variable, Impact Of CSR, can be explained by the independent variable, in this case, 0.84% can be explained, which is very high.

a. Dependent Variable: positive impact

**H02: There Is No Relation Between CSR Initiatives and Organizational Culture, Value and Ethics**

**Interpretation:** The summary output presents regression analysis between CSR initiatives and organizational performance. The regression model is not significant \( p < 0.0005 \), which is less than 0.05, and indicates that there is a significant relation between CSR initiatives and organizational performance. Reject H01, Accept H11. In Table 4.
This correlation table assesses relationships between various aspects of Corporate Social Responsibility (CSR). Notable correlations include:

- The impact of CSR on organizational culture shows a very high correlation with CSR initiatives (0.84), suggesting that initiatives strongly reflect or influence the organizational culture.
- The relationship between observed changes in CSR initiatives and CSR values and ethics is also high (0.77), indicating that changes in initiatives are closely aligned with the values and ethics of CSR.
- CSR’s influence on organizational culture is less correlated with having a strong CSR focus (0.37) and noted changes in CSR initiatives (0.26), implying that broader CSR adoption within a company does not necessarily equate to immediate noticeable changes in culture. There are generally low correlations between having a strong CSR focus and other aspects like CSR initiatives (0.29) and CSR values and ethics (0.08), suggesting that a strong focus does not always translate into execution or alignment with ethical guidelines.

Reject H02, Accept H12

7. Findings

- Age Distribution: Most respondents are relatively young, with the largest groups being those aged 25-34 (33.8%) and under 25 (32.3%). This suggests a younger demographic with preferences aligned with their age groups.
- Job Level: The majority are at mid-level positions (42.3%), indicating a substantial portion of employees with significant influence within the company.
- Familiarity with CSR: About half of the respondents (49.2%) are somewhat aware of CSR, suggesting a moderate level of understanding across the workforce.
- Communication of CSR Initiatives: Over half of the respondents (53.1%) are neutral about the effectiveness of the company's communication regarding its CSR initiatives, indicating potential areas for improvement.
- Importance of CSR in Work: A significant portion values CSR's impact on society and the environment, with 38.5% finding it important and 20.8% very important.
- Perceived Disadvantages of CSR: The primary concern is the genuineness of CSR efforts (47.7%), followed by worries about CSR being used to manipulate public opinion (26.2%).
- Effectiveness of Different Types of CSR: Ethical responsibilities are viewed as the most
effective form of CSR (44.6%), suggesting a strong preference for ethical conduct.

- Impact on Brand Image: Most respondents (64.6%) believe CSR efforts positively influence the company's brand image.

- Benefits of CSR: The leading perceived benefit is operational cost savings (43.1%), followed by better financial performance and brand recognition.

- Participation in CSR Activities: A large portion of the workforce participates in CSR activities occasionally (46.2%), but regular engagement and awareness could be improved.

- Integration of Sustainable Practices: A majority (73.8%) feel the company integrates sustainable practices well, indicating a positive outlook on the company’s sustainability efforts.

- Awareness of Environmental Impact: Most employees are at least somewhat aware of the environmental impact of their work (56.9%), showing a decent level of environmental consciousness.

- CSR’s Role in Attracting Talent: A strong majority (63.1%) agree that a focus on CSR helps attract and retain top talent, emphasizing CSR’s importance in HR strategies.

- Workplace Changes Due to CSR: Nearly half (49.2%) have noticed changes in the workplace due to CSR initiatives, highlighting their tangible impact.

- Influence on Organizational Culture: A significant number of respondents perceive CSR to have a substantial influence on organizational culture (48.5% rate it as 4 out of 5).

- CSR and Organizational Values: Most believe there is at least a moderate relation between CSR and the company's values and ethics (64.6%).

- Contribution to a Healthier Work Environment: A large majority (71.5%) believe CSR initiatives contribute to a healthier work environment.

- Integration of CSR Goals in Performance Evaluation: Over half (56.2%) state that CSR goals are integrated into employee performance evaluations, indicating CSR's role in internal assessment metrics.

- The impact of CSR on organizational culture shows a very high correlation with CSR initiatives (0.84), suggesting that initiatives strongly reflect or influence the organizational culture.

- The relationship between observed changes in CSR initiatives and CSR values and ethics is also high (0.77), indicating that changes in initiatives are closely aligned with the values and ethics of CSR.

- CSR’s influence on organizational culture is less correlated with having a strong CSR focus (0.37) and noted changes in CSR initiatives (0.26), implying that broader CSR adoption within a company does not necessarily equate to immediate noticeable changes in culture.

8. Suggestions
The several suggestions emerge to enhance the effectiveness and perception of CSR initiatives within the company:

**The effectiveness of CSR communication**: there's a need to enhance transparency and regularity in communicating CSR efforts and their outcomes. This could involve more engaging internal newsletters, town hall meetings, and interactive platforms where employees can witness and discuss these initiatives.

**Increase Engagement in CSR**: With a significant portion of the workforce participating in CSR activities only occasionally, strategies to increase regular involvement are essential. Creating more inclusive and varied CSR programs could encourage broader participation across departments.

**Focus on Ethical Practices**: As ethical responsibilities are seen as the most effective form of CSR, emphasizing ethical practices in daily operations and decision-making could strengthen the company's CSR profile and employee alignment with corporate values.

**Strengthen CSR Integration**: With many employees noting the integration of CSR into
performance evaluations and its impact on organizational culture, further integrating CSR goals into key performance indicators for all levels could reinforce the importance of CSR in daily work life.

**Education and Awareness**: Enhancing education around CSR and its impact could help in increasing the understanding and importance of these initiatives among the less aware segments of the workforce, thereby boosting overall engagement and effectiveness.

**Conclusion**

The survey on corporate social responsibility (CSR) within the company has provided valuable insights into how employees perceive and interact with CSR initiatives. The research highlights a generally positive attitude towards CSR, with a strong recognition of its impact on brand image, employee engagement, and organizational culture. Notably, employees appreciate CSR's role in promoting ethical practices and contributing to societal and environmental benefits, which aligns with broader business ethics and sustainability trends in the global corporate landscape. The study also identifies areas for improvement in frequency of CSR Activities. There is a marked neutrality and occasional scepticism concerning the communication and actual impact of CSR initiatives, suggesting that the company could benefit from clearer and more effective communication strategies. While CSR is integrated into performance evaluations and seen as influential in attracting and retaining talent, there is a call for more consistent and inclusive participation in CSR activities across all departments and levels.

Overall, this survey serves as a constructive platform for the Lexiko infra to further integrate CSR into its core operations and strategic planning, ensuring that CSR efforts are not only visible and well-communicated but also genuinely aligned with the company's values and the expectations of its workforce.
